

RV CONNEX

ALPHA

ALL LINK PLATFORM FOR HANDLING ACCESS

Background

The All Link Platform for Handling Access (ALPHA) is an effective and advantageous network that allows for communication and information exchange between land, air, and sea platforms, as well as the command and control centers during ongoing operations. By establishing a near real-time, brain-to-brain channel for communication, it increases timely and accurate decision-making and situational awareness, and reduces errors that can occur from voice communication.

Tailor-made solution

Communication between your military forces is a matter of national security that should be safe and secure, and that you should have complete control over. R V Connex offers a customizable ALPHA solution that will meet your military's requirements and complies with the concept of operation of your country.

With our solution, you will be ensured the following:

- Increase mission success
- Increase survival chances on the battlefield
- Increase combat power from shared sensors and decision-making
